MICHAEL LOGIC™ & DASHHAUL ENGINEER THE “UBER OF FREIGHT”

DashHaul.com and Michael Logic Administration (MLA) develop an efficient realtime mobile tracking network for full truckload shipping.

CHICAGO, IL., Sept. 30, 2016 - DashHaul now has 2,000+ hardworking American shipping and carrier companies saying the new DashHaul Mobile Network (DashHaul v2.0) will be the “uber of the freight industry.” DashHaul’s CEO, Michael Schreiber, says “After delivering over \$1+ Million in shipments last year, our current clients expressed intent to drastically increase business with us due to the game-changing addition of our mobile network.”

Attractively branded and reducing costs for their users, DashHaul is poised to be an institution in Transportation, Manufacturing, Technology and Logistics. DashHaul Co-Founder, Brian Dukes-Levert worked tirelessly with the software engineers at Michael Logic Administration (MLA) to synthesize a forward-thinking business algorithm. “We are achieving our goal of virtually eliminating the dispatcher for independent owner-operator freight carriers,” said Brain.

DashHaul v2.0 is currently servicing majority of The United States and parts of Canada and Mexico. Shippers now take advantage of realtime shipment updates. Fleet drivers benefit from a highly efficient organization of shipment details, realtime messaging with Shippers and document management. DashHaul app is currently available via Apple’s AppStore. Expect DashHaul’s Android version to be released before the Christmas season delivery rush.
